

PREZCOBIX® (darunavir/cobicistat)
PREZCOBIX - Open Bottle Stability

SUMMARY

- An in-use stability study of PREZCOBIX 800/150 mg oral film-coated tablets in 120 mL high density polyethylene (HDPE) bottles was performed to simulate the daily use of the medication by the patient.
- The product remained stable at 25°C/60% relative humidity (RH) and 30°C/75% RH when stored in an HDPE bottle that was opened once daily for 6 weeks. This study was not conducted to assess open bottle stability for longer periods of time.¹

LITERATURE SEARCH

A literature search of MEDLINE®, EMBASE®, BIOSIS Previews®, DERWENT® (and/or other resources, including internal/external databases) was conducted on 06 January 2024.
