

PROCRIT® (epoetin alfa) Latex Content

SUMMARY

- PROCRIT (epoetin alfa) injection is a sterile, clear, and colorless solution.¹
- The excipients of the single-dose and multiple-dose formulations of PROCRIT do not contain natural rubber latex or dry natural rubber (a derivative of latex). The vial stoppers are made from a synthetic compound (synthetic chlorobutyl polymer) and are not produced through the natural rubber latex or dry natural rubber process.²
